JUST ARRIVED

Ex "Alameda"

HORSE SHOEING--par excellence.

Whitman & Wright, TO THE FRONT AGAIN

NO more contracted hoofs, fever in feet, lameness and sore shoulders, forging or over-reaching, corns or quarter cracks.

The Patent Spring Horse Shoe does the business.

Recommended by the California Society of Prevention of Cruelty to Animals.

This shoe is the invention of an old horseman of 40 years experience, and is manufactured in New York City from steel prepared expressly for this purpose, and carefully tempered to retain the elasticity of the spring as long as in use. As the name implies the general principle, is to act as an assistant, where elasticity is natural in the foot.

The toes of these shoes being made heavier than those of the common kind, act as a toe weight, giving a horse a greater length of stride and naturally increasing his speed. For working, or driving, horses used on hard or stony roads and troubled with lameness or sore shoulders, these shoes are an infallible cure, while for sound horses that may become liable to the same complaint they are a certain preventative. They are a protection to corns on horses feet as they relieve the part on which the corns are produced.

Give them but one trial and you will us no other. Satisfaction guaranteed.

We have lately secured the services of a thorough, experienced, and reliable horse shoer of San Francisco who has charge of this branch of our business and who we can most fully recommend to our patrons.

We refer, by permission, to Mr. H. F. Hebbard, Express and Drayman, who has given these shoes a thorough trial, having used a sample set for the past month.
